FOODS TO FEATURE

The foods listed below are expected to be in plentiful supply in January and April 1954. This is not a forecast or an appraisal of supply conditions but is based largely on historical patterns of production and marketing. You may wish to consider featuring these foods for the months designated.

It is expected that these foods will be included in the monthly list of plentiful foods issued by the Production and Marketing Administration shortly after the first of the preceding month. For example, the October list was issued September 4. The foods on these monthly lists are stressed through nationwide informational activities and through food trade merchandising.
